

Mines of the County

Recent samples taken from the bottom of a fifty foot shaft on one of the properties owned by Matthew Carr, at Cedar, gave results of about 100% to the ton in silver for a width of four feet. A small streak in the vein, from which shipping ore was taken gave over 500 ounces silver to the ton. The vein is an excellent one, the ore showing well in the outcrop.

We would impress upon the voters of the state the necessity of voting NO on the proposition of saddling a mine under lease or option with the debts of the lessee or contractor. Remember that this proposition is numbered 302 Yes, and 303 No. Vote in the square after 303. The passage of this law would do the working miner no good, while at the same time it would make the bonding or leasing of mines impossible, the owners fearing that such action would result in the loss of the property. Arizona needs no arbitrary laws of this character.

The Gold Reed Mining and Milling company, composed of H. H. Shuck, of Oatman, and Bisbee, Arizona, people, has installed a gasoline hoister on the Jupiter group of mines, near the Tom Reed property, and are sinking below the 114 level, expecting to continue to the 550 foot level. The big ledge that on the surface showed a vein pitch of 80 degrees south is now pitching 85 degrees to the north and is showing every indication of becoming a great producer. Mr. Shuck is in charge of the property for the company and is making big headway in its development.

Ross D. McCausland has taken an option on the Metallic Accident mine, at Mineral Park, from Thomas McNeely, and will soon have a number of men at work developing the property. The Metallic Accident is one of the old rich properties of the district, it having been discovered by the late Thomas J. Christy in the latter part of the seventies. The ore found in the outcrop ran as high as eight dollars in silver to the pound. A drift cuts a large vein on the property at a depth of about 200 feet, where good grade of copper was found. It is this ore that Mr. Causland will open up.

Anson H. Smith, O. B. Stanton and Philip Smith this week visited the molybdenite mines owned by Smith, Sawyer and Company. These mines are situated in Copper Canyon and Deluge Wash, five miles north of Cedar, and are among the greatest veins in the state. The dump ores, from which a recent sample was taken, gave an average of more than 24 per cent molybdenite, besides three per cent copper. About 300 tons of the ore is now on the dump, the drifts having been run in on the veins more than 140 feet, taking out a width of about six feet in places. Mr. Stanton was greatly surprised with the showing in this property and believes it one of the big things of the state.

Many of the mining papers of the country are raising their voices in protest against the rule of the Copper Queen and Calumet and Arizona, paying their muckers four dollars per day, alleging that muckers are the lowest grade of miners. It seems strange that men that are supposed to know enough to run a newspaper dealing with mining topics are so dense on the subject of mine labor. To those that know a mucker is one of the important factors in mine work, the expert mucker handling more broken rock in the same space of time than could any other class of labor. To be an expert mucker is just as important as being an expert miner, the two dovetailing in together to make a competent whole. We have seen a mucker send to the surface sixty tons of broken rock where men that thought they knew could barely send out forty tons, and this is the reason why mining companies are beginning to recognize the importance of trained shovel men in the underground working of the mines. A man may fail as a miner, but as a mucker he may make good, and vice versa.

Is your husband cross? An irritable fault finding disposition is often due to a disordered stomach. A man with good digestion is nearly always good natured. A great many have been permanently cured of stomach trouble by taking Chamberlain's Tablets. For sale by all dealers.

Rich Strike in Ibis Range.

H. C. Adams has been in town for a few days, coming up from his new strike down in the Ibis range, about 30 miles southeast of Searchlight. Mr. Adams reports a strike of very high-grade silver-lead ore, and it is his intention to go down and take out a car-load and ship it to the smelter in order that he may determine just what he has before going into development work on a very extensive scale. The ore is what is known as anglesite, more commonly called crystallized lead, some assaying 70 per cent, but the main values are in silver, the ore showing well up into the hundreds of ounces in this metal.

Mr. Adams stated that he is not down very deep on the ledge as yet, but that the ore body seems to be getting larger, and while it is impossible to tell just what it will do as depth is gained, yet so far he has been encouraged by what little work he has done. One of the most favorable indications in connection with this prospect, outside of the high values, is that it is in dolomite lime, which is most favorable for this character of ore.—Searchlight Bulletin.

Thursday last M. W. Musgrove, accompanied by Eli Hilty, the well known mining man, departed by automobile to the mouth of the Grand Canyon, where they will make an examination into conditions along the river, especially relative to the big gold bearing gravels through that section. The company that is to be soon organized by Mr. Musgrove will be known as the Grand Canyon Irrigation & Power company, and will have in its organization a number of prominent Kingman business men, as well as business men of New York city. The project that is to be financed by the company is one of the greatest ever undertaken and its successful termination will revolutionize agricultural and mining pursuits in this part of the state, as well as in Nevada and Utah. The Colorado river is capable of generating a great many thousands of horsepower that can be applied to the varied industries of this part of the United States.

F. S. Wilhelm, W. H. Hazel and Mrs. A. F. Fiske, of Los Angeles, who are interested in mining property in the Secret Pass section passed through Kingman a few days ago on their way to the mines. It is understood that work will be started up on these mines within a short time and exploitation carried on during the winter.

"It is a pleasure to tell you that Chamberlain's Cough Remedy is the best cough medicine I have ever used," writes Mrs. Hugh Campbell, of Lavonia, Ga. "I have used it with all my children and the results have been highly satisfactory." For sale by all dealers.

Doctors Use This for Eczema

Dr. Evans, Ex-Commissioner of Health, says: "There is almost no relation between skin diseases and the blood." The skin must be cured through the skin. The germs must be washed out, and so salves have long ago been found worthless. The most advanced physicians of this country are now agreed on this, and are prescribing a wash of wintergreen, thymol and other ingredients for eczema and all other skin diseases. This compound is known as D.D.D. Prescription for Eczema.

Dr. Holmes, the well known skin specialist writes: "I am convinced that the D.D.D. Prescription is as much a specific for eczema as quinine for malaria. We have been prescribing the D.D.D. remedy for years."

We ourselves vouch for the D.D.D.

Billy Mack Sells

Big Tailings Dump.

R. G. Walker, manager of the Humboldt smelter, was in town Monday and Tuesday and while here negotiated for the purchase of the old tailings which have been lying on the dumps of the Billy Mack mill for many years. There are probably 2000 tons of these tailings, and according to the agreement entered into between the Humboldt smelter and Mr. Mack, the smelting company is to take 200 tons of the tailings each month. The price agreed upon will net Mr. Mack a handsome sum. The smelter people will let a contract within the next few days for hauling the tailings to Parker, where they will be loaded on the cars.

A number of years ago ore from the Billy Mack mine was run through a small mill located about four miles from Parker near the Colorado river. This ore netted the owner a large sum, but the mill was not capable of saving all of the values. Much good money went into the tailings, and now after many years have elapsed since the old mill was in operation, these tailings are to net the owner another good nest egg, which Mr. Mack will devote to further developing his mine.

A force of several men is now at work on the Billy Mack mine driving a drift on a good ore body. It is the intention of the owner to run 100 feet on this ore. Shipments will probably be made within a short time, as the ore is of a very good grade.

The Billy Mack mine has quite a respectable record as a producer and has been a bonanza for its owner for the past thirty years. With ample capital back of the property it could be developed into one of the best gold mines in the state.—Parker Post.

What the Sports Say.

In New York the betting favors the election of Wilson 4 to 1, Taft 1 to 5, Roosevelt 2 to 8. Even bets that Taft would receive a greater popular vote than Roosevelt have been made, although Roosevelt is favored over Taft in the mutuels.

A. A. Parke, who has been doing assessment work on mining claims at Union Pass, returned to Kingman a few days ago. His mines are situated in the vicinity of the Frisco mines.

Flagged Train With Shirt.

Tearing his shirt from his back an Ohio man flagged a train and saved it from a wreck, but H. T. Alston, Raleigh, N. C., once prevented a wreck with Electric Bitters. "I was in a terrible plight when I began to use them," he writes, "my stomach, head, back and kidneys were all badly affected and my liver was in bad condition, but four bottles of Electric Bitters made me feel like a new man." A trial will convince you of their matchless merit for any stomach, liver or kidney trouble. Price 50 cents at H. H. Watkins.

The grading of the extension of the Western Railway of Arizona, has been completed and the work of laying steel is now under way. Owing to lack of labor the work is progressing slowly, although it is expected that more men will be secured within a few days. The completion of the road to the mines is to be properly celebrated by the people of Chloride.

Twinges of rheumatism, backache, stiff joints and shooting pains all show your kidneys are not working right. Urinary irregularities, loss of sleep, nervousness, weak back and sore kidneys tell the need of a good reliable kidney medicine. Foley Kidney Pills are tonic, strengthening and restorative. They build up the kidneys and regulate their action. They will give you quick relief and contain no habit forming drugs. Safe and always sure. Try them. H. H. Watkins, Druggist.

IT IS EASIER TO SAVE THE

HAIR

YOU HAVE THAN TO GROW NEW

The tendency to put off until tomorrow what we should do today accounts for most of the bald heads we see in the front row.

Newbro's Herpide stops falling hair and prevents baldness. The dandruff germ is destroyed by its use and a condition of health maintained in the hair and scalp.

Nearly everyone has hair trouble of some description which Herpide will always correct. Don't wait until it is too late.

It is conceded to be the standard hair remedy and is recommended and applied by all the best Hair Dressers and Barbers.
